DETAILED ACTION***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a method of driving a display device which comprises a pixel comprising an EL element and a transistor, wherein the EL element is placed into an emitting state when a first gate voltage is applied to a gate electrode of the transistor and wherein the EL element is placed into a non-emitting state when a second gate voltage is applied to the gate electrode of the transistor, during each of plural sub-frame periods and wherein an absolute value of the first gate voltage is not greater than an absolute value of a voltage across a drain and a source of the transistor, as recited in independent claims 1, 2, 19, 27, 28 and 45. The remaining claims 3-18, 20-26, 29-44 and 46-52 are allowed by virtue of their dependencies on the independent claims. Hence, the examiner has allowed claims 1 through 52.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
